

RESCUE HARNESS[™]

Back in 1983 we designed our Rescue Harness[™] to meet the needs of search and rescue better than a recreational climbing harness. The D-ring attachment point made connecting carabiners easy even when hanging in the harness. Extra wide waist and leg loops created more of a work platform than the slim profile of a climbing harness. Today's harness has waist and leg pads with breathable D3 cloth for greater comfort, a rear waist D-ring for travel restraint and gear loops on each side. With more than a quarter-century of use-inspired evolution, our Rescue Harness continues to set the standard for superb comfort and performance.
